

The Right Connection™

One Piece Petroleum Drop Adapter with Sight Glass

Features:

- Rugged Aluminum Body.
- Buna Seals.
- Large sight glass.

New from Dixon Bayco is the 4540SG, one piece petroleum drop adapter with sight glass.

The female coupler end is designed to easily connect to our API valves, while the 4" male cam and groove is connected to the petroleum drop hose. With the added feature of a practical sight glass which allows the operator a visual confirmation that fuel is flowing from the truck tank into the drop hose.

This one piece design allows for ease of use, not only is this design compact, it is also much lighter than other versions. As always, you can expect to receive not only a quality product, but superior customer service both before and after the sale!
