The Right Connection™

INTRODUCING THE NEW FloTech FT530 TRAILER IDENTIFICATION MODULE READER

FloTech is please to introduce the model FT530 Trailer Identification Module Reader design to read and test Scully type TIM modules mounted inside API compatible overfill sockets.

Testing your TIM module is now as simple as 1,2,3. Simply connect the TIM reader to your socket, press the RED test button, and check if the displayed serial number matches the number on the TIM module. Press RED test button twice to illuminate LCD back light.

FloTech FT530 TIM Reader is compatible with both API Optic and Thermistor sockets. Simply interchange the J-Slot screws to match the socket. Internal lithium battery will last minimum of 5 years depending on use. Unit is self contained and shipped with a hard shell storage case.
